

Here's a set of **30 Multiple Choice Questions (MCQs)** covering the topics of Chapter 1 and 2. These questions are designed to test your understanding of the evolution of the Internet, web standards, universal design, accessibility, ethical use of the web, web technologies, and basic HTML.

MCQ on Chapter 1 and Chapter 2

1. Evolution of the Internet and the Web

1. **What was the original purpose of the Internet?**
 - a) Social networking
 - b) Military communication**
 - c) Online shopping
 - d) Video streaming

 2. **Which year marked the invention of the World Wide Web?**
 - a) 1969
 - b) 1989**
 - c) 1995
 - d) 2000

 3. **Who is credited with inventing the World Wide Web?**
 - a) Bill Gates
 - b) Tim Berners-Lee**
 - c) Steve Jobs
 - d) Mark Zuckerberg

 4. **What was the first web browser called?**
 - a) Internet Explorer
 - b) Mosaic
 - c) WorldWideWeb**
 - d) Netscape Navigator

 5. **Which protocol is used to transfer web pages over the Internet?**
 - a) FTP
 - b) HTTP**
 - c) SMTP
 - d) TCP/IP
-

2. Web Standards

6. **Why are web standards important?**
 - a) To make websites look the same in all browsers
 - b) To ensure accessibility and interoperability**
 - c) To increase website loading speed
 - d) To reduce the cost of web development

 7. **Which organization develops web standards?**
 - a) W3C (World Wide Web Consortium)
 - b) IEEE
 - c) ISO
 - d) IETF

 8. **What is the purpose of HTML5?**
 - a) To replace CSS
 - b) To provide a standard for modern web development**
 - c) To create desktop applications
 - d) To improve database management

 9. **Which of the following is NOT a web standard?**
 - a) HTML
 - b) CSS
 - c) JavaScript
 - d) PHP**

 10. **What does CSS stand for?**
 - a) Computer Style Sheets
 - b) Cascading Style Sheets**
 - c) Creative Style Sheets
 - d) Colorful Style Sheets
-

3. Universal Design

11. What is universal design in web development?

- a) Designing websites for a specific audience
- b) Creating websites that are accessible to all users, including those with disabilities**
- c) Using only one design template for all websites
- d) Designing websites for mobile devices only

12. Which of the following is a principle of universal design?

- a) Complexity
- b) Flexibility in use**
- c) Exclusivity
- d) High cost

13. What is the purpose of alt text in images?

- a) To improve SEO
- b) To provide a description for screen readers**
- c) To make images load faster
- d) To add decorative elements

14. Which tool can be used to check website accessibility?

- a) W3C Validator
- b) Google Analytics
- c) WAVE (Web Accessibility Evaluation Tool)**
- d) Adobe Photoshop

15. What does WCAG stand for?

- a) Web Content Accessibility Guidelines**
 - b) Web Coding and Graphics
 - c) Web Content and Graphics
 - d) Web Coding Accessibility Guidelines
-

4. Accessible Web Design

16. **Why is accessible web design important?**

- a) To make websites look visually appealing
- b) To ensure all users, including those with disabilities, can access the website**
- c) To increase website loading speed
- d) To reduce development costs

17. **Which HTML attribute is used to make tables accessible?**

- a) alt
- b) title**
- c) summary
- d) caption

ARIA stands for **Accessible Rich Internet Applications**. It is a set of attributes that can be added to HTML elements to make web content and applications more accessible to people with disabilities, particularly those who use screen readers or other assistive technologies.

Purpose of ARIA: ARIA helps bridge the gap between dynamic web applications and assistive technologies by:

1. **Providing additional context:** ARIA roles, states, and properties give screen readers more information about the purpose and behavior of elements.
2. **Enhancing interactivity:** ARIA makes complex web applications (e.g., single-page applications, dynamic content) more accessible.
3. **Improving usability:** ARIA ensures that all users, including those with disabilities, can interact with web content effectively.

SEO stands for **Search Engine Optimization**. It is the process of improving a website's visibility and ranking on search engine results pages (SERPs) to attract more organic (non-paid) traffic. The goal of SEO is to make a website more relevant and authoritative in the eyes of search engines like Google, Bing, and Yahoo.

18. **What is the purpose of ARIA roles in web development?**

- a) To improve website performance
- b) To enhance accessibility for screen readers**
- c) To add animations to websites
- d) To improve SEO

Accessible color contrast ratio refers to the difference in luminance (brightness) between text (or graphical objects) and their background, ensuring that content is readable and usable by people with visual impairments, including color blindness. It is a critical aspect of web accessibility and is defined by the **Web Content Accessibility Guidelines (WCAG)**.

Why is Color Contrast Important?

1. **Readability:** Ensures text is legible for all users, including those with low vision.
2. **Usability:** Helps users distinguish between elements (e.g., buttons, links, and backgrounds).
3. **Compliance:** Meets accessibility standards like WCAG, which are often required by law.

19. Which of the following is an example of an accessible color contrast ratio?

- a) 2:1
- b) 3:1
- c) 4.5:1
- d) 1:1

20. What is the purpose of semantic HTML?

- a) To make websites load faster
 - b) To improve accessibility and SEO
 - c) To add visual effects
 - d) To reduce development time
-

5. Reliable Resources and Ethical Use of the Web

21. Which of the following is a reliable source of information on the web?

- a) Personal blogs
- b) Wikipedia
- c) Peer-reviewed journals
- d) Social media posts

22. **What is an example of ethical use of the web?(符合道德)**

- a) Copying content without attribution
- b) Sharing copyrighted material
- c) Citing sources properly
- d) Spamming emails

23. **What is plagiarism? (抄袭)**

- a) Using someone else's work without permission
- b) Sharing information on social media
- c) Creating original content
- d) Improving website performance

24. **Which of the following is NOT an ethical practice on the web?**

- a) Respecting user privacy
- b) Spreading misinformation
- c) Giving credit to original authors
- d) Using open-source software

25. **What is the purpose of a Creative Commons license?**

- a) To restrict access to content
 - b) To allow free use of content with certain conditions
 - c) To increase website traffic
 - d) To improve SEO
-

6. Web Browsers, Servers, and Protocols

26. **What is the primary function of a web browser?**

- a) To store web pages
- b) To display web pages
- c) To create web pages
- d) To host web pages

27. **Which protocol is used to send emails?**

- a) HTTP
- b) FTP
- c) SMTP
- d) TCP/IP

28. **What is the purpose of a domain name?**
- a) To identify the location of a web server
 - b) To store website files
 - c) To improve website performance
 - d) To create web pages
29. **What does URI stand for?**
- a) Uniform Resource Identifier
 - b) Universal Resource Identifier
 - c) Unified Resource Identifier
 - d) Unique Resource Identifier
30. **Which of the following is an example of a top-level domain (TLD)?**
- a) .com
 - b) .html
 - c) .http
 - d) .www

MCQs on Basic HTML5 Tags

1. What does HTML stand for?
- a) Hyperlinks and Text Markup Language
 - b) Home Tool Markup Language
 - c) Hyper Text Markup Language
 - d) Hyper Text Machine Language
2. Which tag is used to define the root of an HTML document?
- a) <html>
 - b) <head>
 - c) <body>
 - d) <root>

3. Which tag is used to create a hyperlink in HTML?

- a) <link>
- b) <a>**
- c) <href>
- d) <hyperlink>

4. Which tag is used to insert a line break in HTML?

- a)
**
- b) <lb>
- c) <break>
- d) <newline>

5. Which tag is used to define a paragraph in HTML?

- a) <para>
- b) <p>**
- c) <paragraph>
- d) <pg>

6. Which tag is used to display an image in HTML?

- a) **
- b) <image>
- c) <picture>
- d) <src>

7. Which attribute is used to specify the source of an image in the tag?

- a) src
- b) link
- c) href
- d) url

8. Which tag is used to create an unordered list in HTML?

- a)
- b)
- c)
- d) <list>

9. Which tag is used to create a table row in HTML?

- a) <tr>
- b) <td>
- c) <th>
- d) <table>

10. Which tag is used to define the header of a table in HTML?

- a) <header>
- b) <th>
- c) <thead>
- d) <td>

11. Which tag is used to define the main content of an HTML document?

- a) <main>
- b) <content>
- c) <body>
- d) <section>

12. Which tag is used to define a section in an HTML document?

- a) <div>
- b) <section>
- c)
- d) <area>

13. Which tag is used to define a footer in HTML?

- a) <footer>
- b) <bottom>
- c) <end>
- d) <foot>

14. Which tag is used to define a navigation menu in HTML?

- a) <nav>
- b) <menu>
- c) <navigation>
- d) <navbar>

15. Which tag is used to define a heading in HTML?

- a) <h1>
- b) <head>
- c) <header>
- d) <heading>

16. Which tag is used to define a comment in HTML?

- a) <!-- -->
- b) <comment>
- c) <cmt>
- d) <!comment>

17. Which tag is used to define a form in HTML?

- a) <form>
- b) <input>
- c) <submit>
- d) <action>

18. Which tag is used to create a dropdown list in HTML?

- a) <select>
- b) <dropdown>
- c) <list>
- d) <option>

19. Which tag is used to define a video in HTML?

- a) <video>
- b) <media>
- c) <movie>
- d) <play>
